IPS Global Education Day Session
Prior to the AAD Annual Meeting in Washington, D.C.

February 28, 2019
Walter E. Washington Convention Center
Room 146A  |   2 – 6 p.m.

This educational event features a stellar faculty from around the world. Learn the use of superficial to deep chemical peels for various therapeutic and aesthetic indications across all skin types.

Case presentations, techniques, tips and clinical trends highlight the scientific agenda:

- Histologic effects of superficial, medium and deep peels
- Procedural considerations: skin preparation, patient comfort and post-procedure
- Art of chemical peeling
- Mastering superficial peels
- Lip augmentation
- Indications and application techniques of superficial and medium depth chemical peels
- Complication prevention and management
- Educating patients about chemical peels and marketing
- Composition of phenol-croton oil chemical peels
- Segmental and full face phenol-croton oil chemical peels
- Safety considerations in phenol-croton oil chemical peels
- Peels for men

Register by January 28 and save up to $100!
