MIPS 410: Psoriasis: Clinical Response to Oral Systemic or Biologic Medications

Electronic health records (EHRs) collect and organize notes, medication lists, and patient information using various formats. With providers also documenting this information in unique ways, this can potentially cause confusion and an increased timeline for measure mapping with DataDerm. This tip sheet can help you manage reporting requirements for performance measures and streamline standard documentation practices to allow seamless data pull into DataDerm.

The DataDerm team will work with you to connect DataDerm with your EHR to extract data. To make that as smooth as possible, it helps to document key elements of patient care. DataDerm cannot read scanned images of any kind, including scanned images for labs, letters to physicians, pathology reports, follow-up plans, and dates. If you have scanned images with information needed for your measures, please add a note in your chart with the date and required patient information for this data to be accurately collected.

This tip sheet can assist paper-based practices in standardizing documentation practices. Keeping notes in the patient’s paper chart of all documentation requirements will assist you when reporting for this measure.

### MIPS 410- Psoriasis: Clinical Response to Oral Systemic or Biologic Medications

- For all patients, document the following in your notes:
  - Current diagnosis of psoriasis vulgaris
    - Include the ICD-10 code L40.0 and
    - CPT or HCPCS codes for the patient encounter during measurement period (99201, 99202, 99203, 99204, 99205, 99212, 99213, 99214, 99215, 99324, 99325, 99326, 99327, 99328, 99334, 99335, 99336, 99337, 99341, 99342, 99343, 99344, 99345, 99347, 99348, 99349, 99350, G0438, G0439)
  - Code G9764 - Patient is treated with an oral systemic or biologic medication for psoriasis
    - List oral systemic or biologic medication on medication list and/or identify biologics prescribed for treatment of psoriasis vulgaris
    - Provider name that ordered the oral systemic or biologic medication in notes or identify biologics ordered by another provider
    - State date the biologic or oral systemic was prescribed
      - Document dates of any gap in medication use
      - Document if patient had a gap of 4 weeks or more during the course of treatment
  - Assessment scale name, date provided, and results/score
    - Physician Global Assessment (PGA)
    - Body Surface Area (BSA)
    - Psoriasis Area and Severity Index (PASI)
    - Dermatology Life Quality Index (DLQI)
  - Document if applicable:
    - Patient declined therapy change
    - Patient has documented contraindications
    - Patient has not been treated with an oral systemic or biologic for at least 6 consecutive months

MIPS 410- Psoriasis: Clinical Response to Oral Systemic or Biologic Medications

### Additional Tips:
- Collect **once per performance period** for patients seen during the performance period.
- This measure **ONLY** applies to patients with a diagnosis of [psoriasis vulgaris](L40.0).
- See measure specifications for additional codes that can assist in seamless measure mapping from your EHR to DataDerm, if applicable (e.g. G9649).
- GQ and GT telehealth modifiers make cases ineligible.
- Go to the DataDerm dashboard Resources” tab to get the assessment tools for this measure. Click “Tools” for resources on picking the best assessment tool for your workflow.
