

DOCUMENTATION TIPS

MIPS #111: Pneumococcal Vaccination Status for Older Adults

Electronic health records (EHRs) collect and organize notes, medication lists, and patient information using various formats. With providers also documenting this information in unique ways, this can potentially cause confusion and an increased timeline for measure mapping with DataDerm. This tip sheet can help you manage reporting requirements for performance measures and streamline standard documentation practices to allow seamless data pull into DataDerm.

The DataDerm team will work with you to connect DataDerm with your EHR to extract data. To make the process as smooth as possible, it helps to document key elements of patient care. DataDerm cannot read scanned images of any kind, including scanned images for labs, letters to physicians, pathology reports, follow-up plans, and dates. If you have scanned images with information needed for your measures, please add a note in your chart with the date and required patient information for this data to be accurately collected.

This tip sheet can assist paper-based practices in standardizing documentation practices. Keeping notes in the patient's paper chart of all documentation requirements will assist you when reporting for this measure.

MIPS #111: Pneumococcal Vaccination Status for Older Adults

For all patients 65 years and older, document the following in your notes:

- The CPT or HCPCS code for the patient encounter during the reporting period
 - 99201, 99202, 99203, 99204, 99205, 99212, 99213, 99214, 99215, 99341, 99342, 99343, 99344, 99345, 99347, 99348, 99349, 99350, G0402, G0438, G0439
- Note in the medical record whether the patient was administered or previously received a pneumococcal vaccination.
- If the patient is not eligible, note in the medical record if applicable:
 - Patient received hospice services during the measurement period (G9707)

Additional Tips:

- Collect **once per performance period** for patients 65 and older seen during the performance period.
- See measure specifications for additional codes that can assist in seamless measure mapping from your EHR to DataDerm, if applicable (e.g. 4040F).
